

Ren Kyst - got a spare afternoon?

nickturner, Friday 31 January 2014 - 12:39:08

Tshed gladly provided some of the equipment and Nick Turner of Tshed shot this 5 minute film about marine litter and coastal cleanups in northern Norway for producer Verity White. Filmed in the Troms ø area in northern Norway in the summer of 2013. The film aims to show some of the aspects of the global environmental challenge of marine litter and plastics in the oceans, and that this now affects even the smallest creatures of the sea. There is a very simple way that most of us can help to solve at least part of this problem. Don't litter, go clean a beach and tell the world about it. This film was made as part of the Ren Kyst 2013-2014 project which aims to clean up close to 40 especially littered coastline locations in the Troms ø region. To view this short film please visit and share the link.
